A TRAILBLAZER JOINS THE FAMILY: FWS DHA GUJRANWALA

The opening of Future World School & College, DHA Gujranwala marks another step in The Millennium Education Group's expansion and reflects its focus on purpose-built campuses rather than conventional school infrastructure. The campus is designed around contemporary teaching, with dedicated laboratories, technology-enabled classrooms, and sports facilities built into the design rather than added to an existing building. It extends access to internationally recognized pathways, including IGCSE and A-Level programmes, connecting the campus to the Group's wider academic structure rather than leaving it to operate as an isolated new institution.

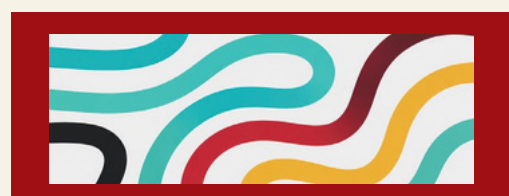

STRENGTHENING THE FOOTPRINT IN GUJRANWALA

For The Millennium Education Group, the opening strengthens its footprint in Gujranwala and adds another purpose-built campus to a growing network. It represents an investment not only in physical infrastructure but in an environment aligned with the Group's international academic offerings. As DHA Gujranwala continues to develop as a residential community, proximity carries weight: families seeking IGCSE and A-Level education now have that option closer to home.

BACK TO SCHOOL SESSION 2026-27

After a summer away, the gates opened again for the 2026-2027 academic session. Students returned to familiar corridors, found their friends waiting, and met the teachers who will guide them through the year ahead. Decorated entrances, first-day assemblies and the ordinary noise of a school filling up again marked the start of the session. Classrooms were readied, timetables handed out, and the first lessons of the year got underway. The opening days are rarely about coursework. They are about settling in, finding a rhythm, and getting used to a room and a routine that will hold for the rest of the session. For new admissions, it was a first morning. For everyone else, a return.

JASHN-E-AZADI AT MILLENNIUM: A SEA OF GREEN AND WHITE

Campuses nationwide marked Independence Day in green and white. Morning assemblies opened with the national anthem, flags lined the corridors, and children arrived wearing badges pinned to their uniforms. Milli naghmay carried through the morning, followed by activities held across year groups through the rest of the day.

The occasion is observed so that students understand what this homeland cost. Independence was earned through sacrifice, and the day is set aside to remember the men and women who gave their lives for it. Much of the day was shaped by the students themselves. Assembly speeches were written and rehearsed in the preceding week, corridors were decorated by senior year groups, and the youngest classes arrived with flags they had made in the days before.

TABLE TALK OPENS AT FUTURE WORLD RAWALPINDI

Table Talk opened its doors at Future World School & College, Bahria Town Rawalpindi on 8 August 2026, with Dr. Chaudhry Faisal Mushtaq TI, Founder and CEO, attending the launch. Established in 2002, Table Talk brings proper meal options onto campus for students and staff, replacing the usual canteen fare with food prepared to a restaurant standard. A school day runs long, and what is available to eat during it matters more than it is usually given credit for. The café is intended to serve students through the day and to give staff somewhere to sit down.

RESULTS 2026: A RECORD ACROSS THE MILLENNIUM NETWORK

Our learners have delivered an outstanding performance in the examinations of 2026:

Cambridge IGCSE, A Level and **Pearson Edexcel IGCSE**. Results of this standard are the work of a long year, of teachers who stayed late and of learners who sat down to revise when something easier was available.

Our congratulations go to every learner who sat these papers, and to the parents who carried them through it, sitting up through late revision and holding steady when the pressure told. The results belong to you both.

Because at The Millennium Education, we don't just educate. We inspire. Forty years of proven excellence stand behind these results, and behind every learner who passes through our campuses. Countless futures built. One unwavering commitment: your child's success.

WINDSOR CAMPUS ORIENTATION IN WAH CANTT

Roots Millennium School Windsor Campus, Wah Cantt hosted its Orientation Session on Saturday, 8 August 2026, bringing parents together with the leadership team of The Millennium Education for an introduction to the campus and its educational vision. Dr. Chaudhry Faisal Mushtaq TI, Founder and CEO, welcomed parents personally and set out the reasons behind choosing Wah Cantt.

He emphasised education that prepares children for the future by developing confident, creative, independent and responsible learners.

The leadership team outlined what families can expect from the Windsor Campus: strong academics, individual attention, co-curricular opportunities, technology and innovation, and the overall development of every child. Central to the discussion was the relationship between parents and school.

Dr. Faisal Mushtaq emphasised that choosing a school is a matter of trust, and that parents should feel confident their children are in an environment where they are valued, supported and encouraged to reach their full potential. The response from parents made the session a meaningful beginning.

MILLENNIUM STUDENTS AT OXFORD

Millennium students took part in the Oxford Summer Programme 2026, gaining first-hand exposure to an academic environment built around discussion, independent inquiry and intellectual exchange. The programme brought together students from different countries for academic sessions, research projects and debates, alongside opportunities to experience Oxford's historic colleges and university environment. Its defining feature was active participation. Rather than attending lectures, students contributed to seminar-style discussions, developed research-based arguments and responded to opposing viewpoints, requiring them to think independently and defend their reasoning.

The international cohort added a further dimension. Group projects and discussions meant working alongside peers from different educational backgrounds, listening carefully and engaging constructively with unfamiliar perspectives. Exposure to Oxford's colleges and academic traditions gave students a sense of the culture surrounding one of the world's established centres of higher education. For those considering international university pathways, the programme offered a practical understanding of the independence, discipline and communication expected at that level.

GERMAN, OUT OF THE TEXTBOOK

Under the PASCH initiative, Schools: Partners for the Future, a group of Millennium students travelled to Germany to put their classroom German into practice. Launched in 2008 by Germany's Federal Foreign Office, PASCH links more than 2,000 schools worldwide with particular ties to Germany. The journey gave students the chance to explore the country and discover how the language they had studied in textbooks is actually used. They navigated unfamiliar cities, spoke with local residents and met German students of their own age.

BEYOND LANGUAGE LEARNING

Conversations, travel and ordinary daily interactions revealed gaps that written exercises never expose. A word known on the page is not the same as a word recalled at speed, in a shop, from someone speaking at their natural pace. That gap closes only through use, and it closed a little further with each day spent there. Students returned with sharper language skills, but also with greater independence and cultural awareness, having learned that a language is not a subject to be completed but something people use to get through their day. What they brought home was not only vocabulary, but the confidence to use it.
